FAQs

Q - How are the front faces finished?

A - The front faces are coated with a membrane of gloss white PET material.

Q - How are the edges finished?

A - The edges are edge banded with a gloss white 0.1 mm thick PET material.

Q - Can the panel be cut to length?

A - Yes, the panel can be cut to length and to fit around skirting board and pipe work.

Q - Do I need to seal the edges?

A - No, when cutting the board to size you do not need to reseal the edges, the internal material is 100% waterproof.

Q - What is the adjustment range for height?

A - The overall height of the panel and plinth can be set between 460-580mm.
